

CAMPUS TALK

From the chairperson's Desk

With each passing semester, the enthusiasm and the zeal of NDIM family members reaches a new level. Subsequently there are several new ventures, projects and activities, which are accomplished successfully at NDIM. This newsletter is a comprehensive attempt of our editing team in painting the semester long canvas of campus life. I invite all to have a glimpse of the events which have taken place in past semester.

Bindu Kumar

From the Editorial Desk

NDIM aims to achieve the academic excellence in an arena of professional education, contributing society through their excellence in the field of management. Our institute focuses on the holistic development of the students conferring them platform for knowledge enhancement and career development.

Institute in the line for professional development of students organizes mirage of activities to bring out the hidden talent of the young brains. This Newsletter is a comprehensive attempt to present the initiatives taken by NDIM and the glimpse of activities organized by different society prevailing at NDIM.

INSTITUTIONAL INITIATIVES

NITI: NDIM Incubation & Transformation Initiative

NITI is an endeavor seized by NDIM to bring all stakeholders of education on a single platform with a motive to exchange ideas and opinions. NITI seeks to bring synergy and synthesis between education based NGO's, top schools of Delhi and the corporate sector. In this league of broad spectrum NITI organized two 'Panel Discussion' for schools and NGO's. The first session was on 'Igniting Young Minds to Bring About Social Change' moderated by Mr. Mohit Raj, Founder & CEO of TYCIA and the Keynote Speaker was Mr. Vikas Vats, President, HR Association India. The Panelists were Ms. Sunita Dhir (Aarohan, NGO) Ms. Nidhi (Jansharnam, NGO), Ms. Nandini Malhotara (Shiv Nadar School), A. J. Philip (Deepalaya, NGO), Ms. Reena Banerjee (NavSrishti, NGO), Ms. Manjir Gupta (Parivartan, NGO), Ms. Anupama and Ms. Pooja (Balwant Rai Mehta School), Mr. Mritunjay (GHPS School). The second session was on 'Scalability and Last Mile connectivity in Education Sector' moderated by Mr. Mohit Raj. The panelists were Mr. Rishipal (Jansewa, NGO) Ms. Reema (Navsrishti), Mr. Ramanshu (Jansharnam, NGO), Ms Nishtha and Ankit Dixit from (Kind Beings, NGO), Mera India Mera Adhikar, NGO and Mr. Devang (Rotract Club).

Centre for Green Initiatives

As a proactive institution, concerned with the conservation of environment, NDIM established the "Centre For Green Initiatives" in the college with the objective of generating awareness and to promote 'environment care' at individual and community level. The centre aims to create a pervasive atmosphere facilitating conversation, action and feedback on environmental issues engaging faculty, students and the general public.

All the faculty members at NDIM to pledge to 'Go Green' and stop using 'Plastic Bags': Stepping forward to conserve environment!!!!

Academic Excellence

NDIM, in its effort to enhance professional competence of faculty, organized 7 days FDP on "Writing Quality Research Papers in the field of Social Sciences using SPSS and AMOS" from 2 July to 7 July, 2019 at the campus. The FDP enriched the faculty in key domains of research, research design, hypotheses formulation, measurement scales, sampling design and reliability and validity. Expert of research domain Dr Pushendra Kumar (Delhi University) marked his presence in the inaugural session of FDP.

The Faculty Development Programme is a step to enrich faculty vitality!!!

NDIM organized a workshop on Financial Planning on 6 July, 2019 in association with SEBI. Mr. Mandeep Gupta (certified Resource Person of SEBI) discussed the case studies and content, aimed to educate participants about the best investment options for all types of age groups.

The session was really invigorating!!!

NDIM organized a National Leadership Conclave on "Leadership Strategies in the Era of Industry 4.0" on 7th September 2019 at the campus. 'HR Association India' was Industry Partner and 'Dainik Bhaskar' was Media partner for the event. The event was inaugurated by Dr. Naresh Vats (GGSIPIU), Dr. Krishna Nath Pandey (Dean, Lingayas University), Mr Yatendra Dwivedi (Former General Manager Power Grid). The objective of the conclave was to offer forum for corporate and academia to come together and share the experience and knowledge pertaining to global concerns with rapid change in leadership approach due to change in technology and process.

The event was a huge success with active participation from corporate and academic fronts!!!

IIMT Group of Institutions, Greater Noida organized “Business Plan Competition” on 20th September, 2019. The main objective of the Business Plan Competition was to provide a meaningful learning experience for students who are interested in pursuing an entrepreneurial opportunity at some point in their careers. Two students of BBA final year Mr. Akshay Dogra & Mr. Mukul Dev of NDIM participated as a team with full Zeal & Enthusiasm and got 2nd runner up award (3rd Position) in the competition. Their topic of presentation was Online Darji. NDIM congratulates both winners!!!

Cultural Activities

'A good teacher can inspire hope, ignite imagination and instill love for learning'. Teachers' Day was celebrated with full fervor and joy at NDIM on September 5, 2019. The music Society 'Ruhaniyat' and the dance Society 'Meraki' of NDIM gave their stunning performance on the occasion.

NDIM organized the 'Fresher Party' with great enthusiasm, at 'The Panchshila Rendezvous' Malviya Nagar on 7 September 2019 to give warm welcome to the new comers. Party is accompanied with many colorful events and programs like ramp walk, traditional, fusion, and western dances, exhilarating singing performances, and splendid decoration, thus making it a soulful evening. The crowning of Mr and Miss Fresher 2019 was done by honorable Chairperson Mrs Bindu Kumar.

NDIM celebrated “Annual Scholar’s Fest” on 7 & 8th November 2019. This two days fest offered platform for young minds to showcase their talent. Active participation of students from class IX to class XII from schools of Delhi NCR was observed in the event. This 2 days fest included a kaleidoscope of competitions like Quizz • Debate • Essay writing • Extempore • Spell bee • Slogan writing • Best out of waste and various sports activities like chess, carom, table tennis and Sudoku. The Fest was a successful grandeur.

New Delhi Institute of Management proudly announced their first NITI Awards on November 8th, 2019, 6 pm onwards, at the NDIM campus. The NITI Awards, under the NDIM Incubation and Transformation Initiative, rewarded the top NGOs and corporate, in the field of social entrepreneurship. The Awards was presented by the Chief Guests of the event, Sh. Manoj Tiwari (Member of Parliament, Actor, Singer), Mr. Gabriel Sinimbo (High Commissioner, Republic of Namibia) and our Guest of Honor, Dr. Praveen Tiwari (Anchor, Author, Journalist, Doodarshan). The award ceremony was glorified by the presence of esteemed NITI Mentor Panel : Dr. Balmiki Prasad (Secretary, Ministry of Home Affairs, Govt. of India), Mr. S. Rajagopalan, (Chairman, Public Relations Society of India, Delhi Chapter), Dr. Aman Iqbal (Founder, Vantage Enterprise), and Mr. Akram Hoque (Founder-Editor, Policy Times).

It was a regal night for a noble cause.

The Awards to schools and NGOs were presented by our Chief Guests, Sh. Manoj Tiwari (Member of Parliament, Actor, Singer), Mr. Gabriel Sinimbo (High Commissioner, Republic of Namibia), our Guest of Honor, Dr. Praveen Tiwari (Anchor, Author, Journalist, Doordarshan), and the esteemed NITI Mentor Panel, including Dr. Balmiki Prasad (Secretary, Ministry of Home Affairs, Govt. of India), Mr. S. Rajagopalan, (Chairman, Public Relations Society of India, Delhi Chapter), Dr. Aman Iqbal (Founder, Vantage Enterprise), and Mr. Akram Hoque (Founder-Editor, Policy Times).

Sports Achievement

BBA 3rd Year student, Navjot Singh bagged 2nd position in body building under the category of 60-65 kg in GGSIPU annual sports meet 2019. NDIM congratulates Navjot!!

Our student Mr. Karan Takkar from BBA 5B bagged North India Championship and secured second place in Junior Body Building Category organized by Health India Fitness Club .Our heartiest congratulations to Karan !

New Delhi Institute of Management always promotes and ensures holistic development of students through multifaceted activities. In this league, students participated in Inter Collegiate Cross Country Race organized by GGSIPU on 19th September, 2019. The participants included Hardik Sharma (5th Sem), Varsha Poudel (5th Sem), Baibhav (5th Sem), Aman Rawat (5th Sem), Komal Routela, (1st Sem, Grabbed 6th Position in Women Cross Country Race), Purvanshu Singh(1st sem) and Sagar Vohra (1sem).

NDIM's Football (Men's) Team, participated in the Reliance Foundation's Youth Sports Tournament and got qualified in first round after beating by 2-0 to Ramjas College, University of Delhi on 1st October 2019. Mr. Abhilash from BBA (5A) was awarded as "Man of The Match" for scoring 2 goals in the match. Our congratulations to Abhilash!!

Volleyball (women's) Team registered victory in its opening match against MSIT in inter collegiate tournament at GGSIPU on 9th October 2019 and advanced to the second round.

Mr. Navjot Bisht brought laurels to NDIM by winning a silver medal in the Intercollegiate Sports Meet Tournament - 2019-20 in Body Building (Men) organized by the GGSIPU on 17 October. Congrats Navjot!!

Society/ Activity domain	Placemen	No of Days	Location of event	Achievements
Sports society(Body Building)		1	GGSIPU	2 ND POSITION (SILVER MEDAL)
Volleyball (Women)		2	GGSIPU	Qualified for 2 nd Round
Volleyball (Men)		2	GGSIPU	Participated
Kabaddi		3	GGSIPU	Qualified for quarter final
Badminton(women)		1	GGSIPU	Qualified for 2 nd Round
Badminton (Men)		1	GGSIPU	Qualified for 2 nd Round
Athletics		2	GGSIPU	Participated
Football		1	PGDAV College Nehru Nagar	Reliance foundation Youth sports Qualified for 2nd final

Fashion society

Miss Deepshikha BBA student from NDIM makes us proud by winning the title of **Miss India Shining Star 2019** held in Kolkata. The national contest was highly competitive having more than 150 participants from all over nation with multiple rounds.

Recently she was also crowned as second runner up in **Rendezvous 2019**, IIT Delhi. Congratulations Deepshikha!!

Mr. Pawan choudhary was awarded as first runner up in **Mr. & Ms. Rendezvous 2019**, the annual culture fest of IIT DELHI in which only 14 students were shortlisted from all over Delhi.

Congratulations Pawan!!

Dramatics society

Tabiir-The Dramatic Society of NDIM won a cashprize of Rs.10,000 in **Rangrezz'19** a National Theater Competition organized by Chitkara University, Chandigarh.

Corporate Social Responsibility

CSR Society of NDIM organized an exhibition in association with Braham Kumaris on 23-09-2019 for BBA students. The main objectives of this exhibition were:

1. To promote positive thinking among youth
2. To strengthen swachh bharat abhiyan and promote the importance of cleanliness
3. Inspiring youth to inculcate spiritual values & character building through Raj yoga & meditation

It was an effort for promoting holistic development of youth by empowering them in living values & life skills through Raj yoga meditation, qualitative inputs & interaction with youths.

ROTARACT CLUB OF NDIM KHUSHIYAN

On 24th of October 2019 the Rotaract club of NDIM organized an event namely Khushiyan the Diwali celebration at old age home at Garonda Old Age Home, Asola, Fatehpur Beri.

The event started with a brief interaction followed up with some fun games and activities like singing and dancing with the senior citizens. Fruits, biscuits, juice and snacks like samosas and lassi were distributed to senior citizens. Their houses were decorated with rangoli and balloons. The first old age home visit was a great success.

Riwayat 2.0

Rotaract Club of NDIM Sponsored by Rotary Club of Delhi South-West had Installation ceremony of President of Rtr. Sunil Thakur and His Board of Director. On 5th November 2019, from 12:30 Onwards in New Delhi Institute of Management, 61 Tughlakabad institutional Area, Near Batra Hospital, New Delhi.

Rtn. Sandeep Pal Mandal (President of Rotary Club of Delhi South-West 2019-20), Rtn. VivekGugnani (Director Youth Services), Rtr. IshaVerma (District Membership Committee Chair), Rtr. Ankit (Charter President of Rotaract of DPSRU), Rtr. Vedika (Treasurer Rotaract Club of Maharaja Agarsain) were present in Installation along with 60 Members of Rotaract club of NDIM.

The event begun with a small Nukkad Natak on Blood Donation by Rotary Blood Bank, Tughlakabad; which encourage the entire member to donate blood. Rtn. Sandeep Pal, Rtn. VivekGugnani, Ms. Sadhana, Rtr. Drishti Bhatia, Rtr. Sunil Thakur has lightened the Lamp for the new Beginning.

Oath Ceremony was took place to motivate members to do their best to contribute for a noble cause. Planters were presented to Rtn. Sandeep Pal Mandal, Rtn. VivekGugnani , Rtr. IshaVerma, Rtr. Vedikaby Ms. Sadhana.

Swachh Bharat Abhiyan-2019

NDIM organized a grand cleanliness drive in association with TOBACCGO- NGO on 1st Oct., 2019 on the lines of the 'Swachh Bharat Abhiyaan' launched by our Hon'ble Prime Minister, Sh. Narendra Modi Ji. The campaign was great success as it involved participation of 200 students, faculty members and was led by Chairperson, Ms. Bindu Kumar. The event started at 11 am in the morning with Swachtha pledge taken by everyone present at the moment. The presence of Ms. Poonam Bhati (Hon'ble Councillor, SDMC); Mr. Saurabh Mediratta, Chief Manager, Oriental Bank of Commerce; Mr. Deepak Bhatia, CEO-Rotary blood Bank, Delhi; Rtn. Anmol Chawla, Director, TOBACCGO, Members of AASTHA made the campaign even more inspirational. All the students, faculty and staff members along with the Chairperson and eminent guests were seen sweeping the nearby areas, collecting waste papers, polybags, wrappers, etc. making the event a huge success.

Poster Making Competition

On the occasions of Swachh Bharat Abhiyan, NDIM has organized Poster Making competition on 1st October 2019. The main objective of the event was to engross the hidden talent of the students and to make them understand the significance of cleanliness in their life. The participants were under privileged students of PRAYAS (JAC) Society. The event started at 10:30 a.m. Students showed their abilities through art where in they expressed their feelings in the form of quotations, paintings, sketch etc. The event was judged by Ms. Poonam Bhati (Hon'ble Councillor, SDMC) and Mrs. Bindu Kumar, Chairperson-NDIM. Tahera, Ahamad & Chirag were declared winners of the competition.

Best Out of Waste Competition

The students of NDIM on the occasion of Swach Bharat Abhiyan participated in an Intra Class Best out of Waste Competition on 1st October 2019. The primary objective of the event was to make students aware of uses of waste material, and to give them a lesson on reducing waste to save our future. The event started at 10:30am in campus where students participated in teams and demonstrated fantabulous ideas. They showcased their talent by using the waste materials like newspapers, plastic bottles, empty cans, ice cream sticks, etc, into beautiful Wind mill, Piggy bank, Bird's feeder etc. The judge for the event was Ms. Poonam Bhati (Hon'ble Councillor, SDMC). The participants thoroughly enjoyed using their creativity to innovate and they were felicitated by the judge at the end.

SHIKSHIT BHARAT ABHIYAAN

NDIM on 16th October, 2019 celebrated their Founder's Day. On the birth anniversary of NDIM's founder chairman, H'ble Sh. JR bansal Ji, institute celebrated 'Shikshit Bharat Abhiyan'.

The campaign witnessed participation of around 250 candidates including children, women and men from the nearby backward areas who gathered to take the advantage of registering themselves for free of cost, basic and higher education being provided to them on all the weekends at NDIM. The Chief Guest for the event was Mr. Subhash Bhadana; Deputy Chairman SDMC, Municipal Councillor, CR Park, Bharatiya Janata Party. With happy spirits and accomplished hearts, NDIM's family welcomed all of them with open arms; offered lunch to them and our Hon'ble Chairperson, Ms. Bindu Kumar explained the need of education for the growth of nation.

This was followed by interactive classroom sessions conducted by our student volunteers. Towards the end a drawing competition was held in which Ms. Teena, Mohd. Sahil & Mohd. Ahmad were chosen as winners and felicitated with cash prizes. Stationery kits and free meal was provided to all the kids. The day culminated with a feeling of eternal satisfaction and happiness.

Training & Placement Cell

New Delhi Institute of Management (NDIM) bequeaths their young talent with Knowledge, skills and abilities (KSAs) through their agile Training and Placement cell. Adequate exposure to students is provided to enhance their skills in best possible dimensions to shape their career goals. Training and placement cell accede to disseminate latest happenings of 'Indian Corporate Scenario'.

Mr Jitendra Dhaka & Mr Vivekanand Gupta from Career India: Corporate talk on Saksham & Career Counseling addressing career related queries of Students on 23rd October 2019.

Students gained insights about the "Insurance sector" through interactive Session in corporate talk by Sriram Life Insurance on 17.10.19

The Neuro Linguistic Programme Session On 21st October, 2019 by Dr Sangeet Sharma organized at NDIM campus . Students gained insight about effective management of everyday life.

Tarun Bhandari was awarded with 'Best intern Maverick Millennial Award' by PAN INDIA. The internship was started with 2000+ students all over India. Congratulations Tarun!!!

The one day Free Career Counseling Workshop of Career Launcher Delhi Branch was held on 15th October, 2019 at the campus of New Delhi Institute of Management with participation of nearly 150 students (2nd year and 3rd year students) of our college

INDUSTRIAL VISITS

NDIM visits AMUL: On 27th September, 2019 BBA students visited the AMUL plant located in Faridabad and were exposed to inventory control systems, supply chain management systems, Logistics, Marketing and Packaging techniques of Amul. This industrial visit provided students live exposure to various management concepts.

NDIM visits Bombay Stock Exchange: On 3rd September, 2019, BBA students from NDIM visited BSE, Delhi Office, the first-level regulator in the securities market. The purpose of this visit was to acquire knowledge about the stock exchange structure, its processes & procedures and products traded on it, various training programs and certification exams related to the capital market. This visit enabled students to get a first-hand experience of trading and settlement systems in a stock exchange which would help them during placements

Educational visit to Renewable Energy Expo 2019

Students were exposed to Asia's largest and most influential Energy Expo and highlights upcoming technologies that can change the world including unique case studies from across India and Globe. Students were exposed to the unique concepts relating to renewable energy, various organizations with innovative technologies that are leading participants in this sector, Supporting financing innovation to manage the energy transition with increasing demands, developing the right financing and risk mitigation instruments to encourage new investments, creating the right incentives for investments in new technologies like energy storage, hybrid projects etc. and exploring the opportunity for exploring new products such as Renewable Energy investment trusts, masala/green bonds etc.

FACULTY CORNER

Breaking The Glass Ceiling: Ladies you are the BOSS!!!!

Women empowerment! The Phrase itself disseminates the rainbow of opinions from varied strata of Indian Society and from Vedic literature. The paramount standing of women from ancient Vedic times proved the importance of women in laying founding stone for better society, family and the nation as well. Point to ponder is, what we perceive with our eyes and the message instigated by the media. Article 15(clause 3) of Indian constitution provides special provision for women and children's.

As Per Julia Kagan "glass ceiling is a metaphor referring to an artificial barrier that prevents women and minorities from being promoted to managerial- and executive-level positions within an organization. The phrase "glass ceiling" is used to describe the difficulties faced by women when trying to move to higher roles in a male-dominated hierarchy. The barriers are most often unwritten, meaning that women are more likely to be restricted from advancing through accepted norms and implicit biases rather than defined corporate policies".

The female empowerment is at times a concept which is often not accepted at the grassroots level and this is glorified through harassment scandals. At times it is observed in Indian society and the corporate scenario that women viewpoint at the top of the organizations remain unacknowledged. The responsibility here is that women should be encouraged to # break through # remove glass ceiling # become the BOSS LADY!!!!.

Women these days have marked their presence in varied leadership roles viz entrepreneurship, engineering, administration, health and education etc. at national and international levels. Women are now breaking the traditional glass ceiling and are now constantly evolving in changing roles in different sphere

Women are now desired to clean off the paradigm of male dominated world and should take a lead in setting preferences for both gender with equity. The women leaders in India have set an example for breaking the existing glass ceiling Kiran Bedi, Nirmala Sitaraman, Gagandeep Kang, GS Lakshmi, Vrinda Rathi, Aarohi Pandit, Hina Jaiswal, lighted the path of other women to break the ceiling!!!!

Dr Preeti Singh

Life Defined by Value!

Our life is a saga of experiences. These experiences are constantly defining our character, belief system and response mechanism. People who have been through a life full of challenges and have never hesitated slightest in taking them head on certainly make excellent heroes. Their value system carries all those qualities that are must to be called "experienced". The pertinent question is how to become "Hero" of our own lives.

"A smooth sea never made a skilled sailor." - Franklin D. Roosevelt.

It is crucial to have values. Values enrich life. Life can't be measured alone in terms of age but must be evaluated in terms evolution over those years. Life is not about next minute or next 10 years or 100 years but is about the value we created in those minutes and years.

What defines Value?

A noble character free of all false alliances, a belief system known for its acceptance and capability to embrace adversity and an impeccable response mechanism totally focusing on restoring peace and harmony are best assessment of Value created over any number of years. Our conduct as an individual is proof of our experience!

Character is usually defined as the image we carry and the brand we have created of ourselves but that is not true. In essence, character is rather the power of resilience and perseverance we have and show in the face of the adversity. It shines even brighter in turbulent times. It is testimony of the challenges we have conquered and is best depicted in the compassion we have for everyone around us. If we can't extend support and empathy to those in the middle of problem, what good is our character? A character worth building is that of wisdom, inner strength, eternal life force and courage to stand alone.

Our belief system is directly related to the kind of exposure we have gained over the years. It certainly has got very little to do with our geographical placement though but a lot with the fact that how much we are open to possibilities, changes and perspectives. A life of 50 years of age, failing to accept the fact that Worshipping is celebration of victory of light over darkness and can be done by simply lighting a candle and not essentially a typical diya is more of a hurdle and less of an experience!

Our belief system develops and grows best when we embrace people with their different opinions while cherishing the diversity and not considering it as challenge to our competence. In fact competence enhances with enrichment of belief system. Establishing a balance between our realisations from our own observations and learnings shared by other people based on their journey is the only lofty goal of a worthy life.

Response mechanism should never be confused with the jumble words we keep playing with our mouth every now and then but it is the reflection of our inner calm. Our capacity to absorb and contain are true indicators of an exemplary response mechanism. A mechanism working towards cherishing human dignity and restoring self respect in the person in front of us is very important.

The world today is full of challenges and cut throat competition and we're losing friends in the name survival. Survival of the fittest, being so long in vogue, has totally shattered our purpose as most honour worthy creature of God. Cohesiveness is our only and last resort.

Let's create a happier world!
Let's cherish the life in front of us!
Let's impart hope by creating Value in each minute of our lives!

DR. Rachana Saxena

Emerging Technologies in Cloud 2019

Glancing back at 2018, we have had various significant advancements all inclusive - around new innovation patterns, for example, large information, IoT, edge processing and investigation. A large number of these improvements have been clubbed under a typical topic of 'advanced change'. Distributed computing has been another zone that has seen noteworthy change and reception.

Passing by showcase centre and innovation merchant needs a year ago, 2019 is probably going to be another astounding year for innovation by and large, and distributed computing specifically. Three significant variables will drive innovation development in 2019 and past - hyper-rivalry, diminishing IT spending plans and the requirement for computerized advancement. Distributed computing will assume a significant job in driving this advancement. Here are the significant distributed computing centre regions in 2019.

1. Cloud-First and Cloud Native Approaches

While they are diverse theoretically, both 'cloud-first' and 'cloud-local' centre on utilizing cloud framework, to accomplish results, fabricate dynamic adaptability, improve joining/organization and limit costs.

Cloud-first is an IT industry approach that organizes cloud framework over on-premise models. An ever increasing number of CIOs are embracing a cloud-first approach that includes growing new frameworks and relocating existing frameworks (or information) to cloud foundation. Rather than the customary lift-and-move approach, numerous organizations are re-architecting existing applications to consolidate highlights like auto-scaling and multi-tenure.

Cloud local is an improvement approach, and alludes to applications that are intended to run uniquely on the cloud. Cloud-local application advancement utilizes ideas, for example, containerization and micro services to make a lot of administrations that can be arranged and progressively scaled according to business needs.

2. Heritage Integration Challenges

As the cloud impression inside enterprises and associations keeps on developing, integrating large, heritage solid applications (counting inheritance information designs and shut architectures) with fresher cloud-based

frameworks will be one of the most testing bits of the cloud story. CIOs need to manage various difficulties, for example, cross-stage availability, information standardization, API creation, personal time/inactivity issues and security the executives.

Simultaneously, we see that fringe applications like HCM, entrances, group the board devices, and so forth are now being supplanted with cloud-local counterparts (either through new advancement, re-building or outsider SaaS items). This is disentangling combination and the board of heritage situations alongside cross breed cloud biological systems.

3. Multi Cloud Strategies

All around, organizations are moving to a profoundly use case driven way to deal with cloud administration and cloud seller appropriation. The utilization of various cloud sellers has been predominant for a couple of years, particularly in enormous, geologically disseminated associations. In 2018, we saw this pattern turning out to be more standard, and as the administration unpredictability expanded, 'multi-cloud' turned into an unmistakable zone of exchange. Examiners like Gartner, Forrester and IDC have a very inspirational standpoint towards this pattern. Gartner predicts the multi cloud advertise size to reach \$240 bn in 2019.

2019 will likewise be the year when associations will begin building multi-cloud techniques that address key difficulties around innovation stacks, movement, joining, outstanding burden needs, security and aptitudes.

4. Hyperscale Datacenters

The monstrous measures of information being created by individuals (social information), gadgets (counting IoT, wearables, sensors) and ventures (EDW, information lakes) will begin to bring an incentive through examination. Numerous ventures, for example, banking, medicinal services, internet business, long range interpersonal communication and store network the executives have just experienced noteworthy advanced change, and this is the reason hyperscale datacenters have just observed huge development in the last 2-3 years. Hyperscale datacenters are getting necessary to mixture IT methodologies of numerous associations.

Other developing ideas like information virtualization are quickening this pattern. We as of now have almost 500 hyperscale datacenters over the world and the number is probably going to go past 600 in the following scarcely any years.

5. Cloud Security

The number and power of cyber attacks has risen enormously over the most recent couple of years. We additionally observed huge administrative moves in 2018 (e.g., GDPR in Europe, new information security laws in India) that made individual information assurance a hierarchical need, with serious budgetary repercussions if there should arise an occurrence of resistance.

With more noteworthy cloud selection, information protection and security will have more prominent consideration and interest in 2019, particularly around endpoint security, crypto dangers and social building assaults. Overseen Detection and Response (MDR) approaches, for example, ongoing risk checking and SIEM will outweigh customary remediation-based security rehearses. Overseen Security Service Providers (MSSPs) will grow in broadness and profundity of contributions and will help IT divisions bring down their presentation to cloud vulnerabilities and dangers.

6. Cloud Backup and Retrieval

Cloud framework has become default for reinforcement and recovery tasks, and to address DR needs of associations. The developing pattern of cloud reinforcement and recovery has been complemented by various variables, including cloud-first procedures, evaluating concerns and quick adaptability needs. Actually, as indicated by Gartner, 90% of associations will utilize cloud administrations for their DR needs by 2020.

We additionally observe that AWS is taking a critical lead comprehensively, in the cloud reinforcement and recuperation space, basically because of powerful and amazingly savvy stockpiling items like S3, EFS (Elastic File Service), EBS (Elastic Block Storage) and Glacier. In 2019, there would be numerous other distributed storage sellers that would present specific reinforcement and DR contributions, yet AWS is probably going to remain ahead because of its gigantic foundation, endeavour grade cloud arrangements and a portion of the world's best and accessibility SLAs.

7. Cloud-Based Network Services

In the most recent year, we have acutely watched the broad selection of on-request organize administrations, generally because of advantages, for example, bound together security, arrange investigation, cloud combination and dynamic traffic advancement. Ideas like SD-WAN, NFV (Near Field Virtualization) and NaaS (Network-as-a-Service) began picking up footing in 2018 however didn't generally make it to large scale appropriation. Be that as it may, framework pioneers like Cisco, IBM, VMWare and NTT Communications are now offering solid SD-WAN and NaaS arrangements with a large group of cutting edge highlights.

System as-a-Service or NaaS is supplanting conventional systems administration foundation and enabling organizations to manufacture a virtual, halfway oversight framework that streamlines traffic, improve arrange execution and scale on-request.

In 2019, we ought to expect a slow ascent in SD-WAN and NaaS appropriation, with most driving sellers fabricating new contributions and driving business sector infiltration. We are still some path before large scale selection of these advances.

8. Serverless Architectures

The serverless figuring (otherwise called backend-as-an administration or capacity as-an administration) approach, as we would like to think, is genuinely transformational regarding building enormous server versatility and process control, while keeping asset usage to insignificant levels. We have just observed an organization like Kubernetes make critical progress in the containerization, administration coordination and serverless design space. AWS has additionally made significant headways in this space with Lambda.

In 2018, the serverless idea took off in a major manner inside the advancement, testing and database the board networks, with the guarantee of permitting engineers and analyzers centre around their centre exercises (coding, testing, and so forth.), without stressing over foundation improvement or adaptability. We ought to anticipate a more grounded take-up of these models in 2019, as a more prominent number of improvement groups move to Agile and DevOps models.

While the distributed computing commercial centre experiences fast advancement in 2019 and past, CIOs should fabricate oversight administration associations to explore the cloud environment, adjust to patterns and characterize a cloud-driven guide for their IT association.

Dr Rakhi Chawla

STUDENT CORNER

PRACTICALITY BEYOND REALITY

I have always been a curious person, while growing up I aspired to be a scientist or an inventor. Children's encyclopaedias were my primary and my most favourite source of knowledge back then.

I wanted to know the science behind everything possible so I thought I could learn enough to make crazy discoveries and invention which can help the mankind live an easier life and make a difference.

As I grew up, to my surprise, I realised the world doesn't work the way I thought it would.

The school and its representatives are just corrupting the entire system for their selfish reasons (of course) . The real sufferers of the selfishness are the students, especially the ambitious ones (Don't forget every student was once an ambitious one) who are only taught to excel/pass the exams and nothing beyond that. The exams are only to test our memory.

So, when we had to choose the right stream for our higher studies (THE MOST IMPORTANT PART OF A STUDENT'S LIFE) I chose science (PCM) . Disappointed me realises the education I craved for and the education I got was parallel; they never met, I got sidelined and lost the track and failed in 11th. When I realised I need to "pass this basic system to succeed in the society" I gave my exams again and secured enough marks to "clear" the grade.

Later for my undergrad I chose BBA (management) as a career option only to explore how the whole management thing works.

New college, new course and a different lifestyle obviously I was excited but it was too late when I understood that I got trapped in the vicious circle of mugging up the entire course for the end term examination.

Once while attending a class on financial management, I realised everything that we were taught had a subtext, only important for the theoretical exams and I thought to myself that what if the lecturer taught us something that was practically important and not just to mere clear exams!! Wouldn't it be smart enough if they actually taught us something that helps us be more productive and intellectual?

The system is killing our dreams! We are watered and taught to be the same. Robots and workers of same capabilities. We are programmed to work in the same format, tampering every mind to work similarly without understanding that we are all humans and different from each other.

We have evolved throughout this evolution of billions of years we are the flagship product of this cosmos , we are born for something bigger than us, we are born to do something that can serve everyone as they say, the hand which distributes the roses gets the fragrance too.

The 12 pound thing between our shoulders has an infinite potential to do greater things but the system and society are just murders of the curiosity and ambition by moulding everyone in the same cast by preparing us only to clear the exams. Anyway, we are being fed facts, figures and statistics and with that, wisdom's sugar-coated.

I may be wrong but this is what I strongly believe in and this is my perception of the world. Nobody i feel is wrong or right, everyone has a different ideology but the society kills it each time.

And the conservation of ideology is the need of the hour, don't ever let them tell you can't do it or you're just being over-ambitious and if they ever tell you that you're being over ambitious and they ask you to live in practicality just remember the Wright brothers made the first flight not the critics so just take a deep breath, look around yourself as you're here to be the best and a better version of yourself.
